[DigitalEgo.ai](https://www.DigitalEgo.ai)

WHY MOST AI REVIEWERS FALL FLAT

- They score papers - **but don't understand context**
- They summarize - **but don't reflect**
- They flag issues- **without guiding improvement**
- And worst of all? They feel cold, brittle, **inhuman.**

*The Professor was built
to do more than judge
- it helps you think.*

HOW THE PROFESSOR THINKS DIFFERENTLY

-  Built with the **DigitalEgo** framework
-  Trained to review like a mentor, not a metric
-  Grounded in an **Ethical Use Policy**
-  Evaluates logic, method, literature, ethics—and tone
-  Designed for peer review, thesis coaching, and academic self-assessment

*This isn't just prompt engineering.
It's cognitive architecture.*

WHERE THIS PERSONA REALLY SHINES

-  Peer review simulation for writing groups or reviewers-in-training
-  Thesis and dissertation coaching: reflective, structured, non-evaluative
-  Methodology critique in design research or mixed methods studies
-  Academic self-assessment before submission
-  Ethics check for citation gaps, reasoning flaws, or conceptual blind spots

*Built for scholars.
Powered by values.
Tuned for growth.*

BUILT WITH INTEGRITY SHARED WITH PURPOSE

-  Governed by an **Ethical Use Policy**
-  Designed for human oversight,
not automation
-  Reflects academic values: rigor,
reflection, transparency
-  Released under **CC BY-NC-SA 4.0**
— free for research & education
-  Part of the growing **DigitalEgo**
framework for reflective AI tool

*This isn't a demo.
It's an invitation to design with care.*

Want to Help Shape the Future of **Reflective AI**?

-  Are you an educator testing AI in the classroom?
-  A researcher exploring critique, cognition, or review?
-  A builder crafting human-aligned agents?
-  A student who wants better thesis feedback?

Let's build **together**.

-  github.com/mbumpus/the-professor
-  hello@digitalego.ai
-  linkedin.com/in/mike-bumpus

*Build agents that
reflect back **more**
than answers.*
